

BROWNS FOOD GROUP

CP02 ENVIRONMENTAL/SUSTAINABILITY POLICY - 2026

FINANCIAL YEAR 2025

Departments : ALL

Objectives : Browns Food Group Ltd is committed to understanding and managing the environmental and sustainability impacts of its operations. We will assess our activities to identify opportunities to minimise environmental impact wherever practicable and will take appropriate measures to ensure compliance with all applicable environmental legislation and regulatory requirements.

Brown Food Group Ltd, Kirkconnel, is a multi-disciplinary food manufacturing organisation, operating from 7 state of the art facilities throughout the UK.

In line with the Browns Food Group philosophy, we are committed to:

- Complying with all applicable environmental legislation, regulations, and relevant codes of practice.
- Preventing pollution and avoiding, reducing, or controlling environmental impacts from our activities.
- Continual improvement of environmental performance across all sites.
- Reducing waste and increasing reuse and recycling, including food waste, effluent sludge, plastics, cardboard, paper, and packaging.
- Promoting paper recycling through dedicated recycling bins provided in all office and administrative areas.
- Maximising the efficient use of energy and water.
- Reducing the carbon footprint of manufacturing and transport operations.
- Investing in energy-efficient machinery and equipment to reduce environmental impact.
- Acting responsibly to protect local biodiversity and minimise any potential impacts of our operations on the surrounding environment.

To achieve these commitments, Browns Food Group will:

- Quantify, monitor, and report environmental performance using KPI's and recognised platforms such as - CBN Expert, EcoVadis, & Secaro.
- Improve production efficiency to reduce food waste and packaging usage and support more sustainable manufacturing processes.
- Work closely with the Group Environmental Manager to increase recycling rates and reduce the volume of waste sent to landfill.
- Ensure energy and water are used efficiently, including the use of LED lighting, thermostatic controls, water-saving measures, and other efficiency initiatives.
- Minimise chemical usage where practicable and ensure chemicals are stored, handled, and disposed of safely to reduce the risk of environmental harm.
- Maintain procedures to prevent, manage, and respond to environmental incidents and emergencies, with the aim of minimising environmental impact and preventing recurrence.
- Reduce transport-related emissions through effective fleet management, route optimisation, and the use of hybrid or electric vehicles where feasible.
- Educate, train, and motivate employees to carry out tasks in an environmentally responsible manner.

This policy is endorsed by the CEO. This is a publicly available document which is available on demand.

Signed:

Wayne Godfrey
